A Climate Conversation: Environmental Protection Rollbacks Under Trump  
Monday, February 10, 2020  
5 PM  
Room 1008  
Dinner will be served

Please join us for a conversation about the current state of environmental regulation under the Trump administration with Environmental and Administrative Law Professor Michael Herz.

Under Trump, over 95 administrative rules are currently under amendment or proposal, all mutually operating to strip away the current level of environmental protection. Perhaps most worrisome are the proposed changes to the National Environmental Policy Act (NEPA) which would remove climate change as a required factor in assessing the viability of major federal projects. Find out what this means and how YOU can publicly comment on the rule by joining us for dinner and conversation.
