Cardozo Students for Human Rights Fireside Chat with Betsy Ginsberg
Monday, Oct. 22 at 12pm in Room 420

Please join us for our first Fireside Chat of the year with Professor Betsy Ginsberg! We will be discussing recent work done by the Civil Rights Clinic and Kavanaugh's confirmation, as well as any advice Professor Ginsberg might have for future civil rights lawyers. There will be delicious catering from Blossom Restaurant!

Please join the Cardozo Art Law Society for its annual Externships in Art Law Symposium. We will have a panel of students discussing their experiences at externships and internships in the art law industry. Lunch will be provided!

When: Monday, October 22nd at 12 p.m.
Where: 5Sem (Room 525)

Please join us in Room 1008 for an exciting event,
"The Wonderful Story of the Repeal of 'Don't Ask, Don't Tell' and of How the Military Did ADR Proud".

This program will explore the behind the scenes multi-party negotiations that led to the 2010 repeal of "Don't Ask, Don't Tell." Colonel Linell A. Letendre, who was a member of the team that helped spearhead the Pentagon's review, will reflect on the process that generated the change and the important lessons learned.

This program will discuss how the Pentagon facilitated a consensus among military branches, key members of Congress and outside interest groups. Their experience is an instructive case study of negotiations and consensus building on a "hot-button" issue that many are aware of, but few know the details of how a consensus was built.

The panel also will address issues concerning the exercise of prosecutorial discretion, particularly in the context of prosecutions of corporate entities.

**Are We Already Living in a "Black Mirror" World?
A Conversation About AI, Law, and Corporate Ethics**

Monday, October 29, 2018

6:15 pm -7:45 pm, Moot Court Room

Black Mirror is an Emmy Award-Winning British anthology TV series that explores near-term techno-dystopias. How close are we to living and working in a Black Mirror world? Many of the episodes highlight cases of AI running amok, involving implantable devices in the body, drone artificial insects, new forms of social media, and novel types of AI-enhanced consciousness, all of which are capable of being hacked, manipulated or controlled in unintended ways. As practicing lawyers in a world of emerging AI apps, we all may be expected to provide advice to a range of corporate and public sector clients on the novel legal issues posed by this new technological landscape. Distinguished speakers will lead a lively session, as we explore the "creepier" aspects of the coming world of AI, and will discuss the legal and ethical issues that we may soon all be facing.
